## ColorPro – constant in colour!

### Coloured protection for cementitious surfaces

OBTEGO ColorPro is a novel, innovative protection system with embedded pigments for colour design of surfaces. Its essential qualities are:

- Chemical reaction with the substrate (silicification)
- Mineral (no polymers such as epoxy or PU)
- Diffusion-open
- DGNB and LEED compliant (building rating for sustainable construction)
- Harmless to health

The core of the solution is the product OBTEGO R-40, a pigmented, two-component special sealer based on lithium silicate, which can be used on both new and old surfaces.

This makes OBTEGO ColorPro an especially attractive option for renovations or for remedying floor coverings with a failed optical effect.

Because it combines with the substrate by silicification, the product cannot be scratched or flake off like a coating.

Moisture penetration from the reverse side cannot lead to blistering, as is often the case with epoxy coatings, for example.

Chemical resistance is also greatly improved (especially against acids).

OBTEGO R-40 is either conventionally applied with synthetic rollers in crosswise direction or sprayed on using airless equipment (for large surfaces).

Once adequately dry, the surface can optionally be polished with a high-speed burnisher for a higher gloss surface.

For special applications, an additional OBTEGO impregnating sealer can be applied as a complement.

## **OBTEGO - *On site worldwide!***

OBTEGO solutions will be counseled and distributed in Germany exclusively by OBTEGO AG and a few, selected system partners. We set the highest value on professional advice and execution, which is why OBTEGO products are not available for sale in specialty stores either. All over the world, there is a network of partner

companies which market OBTEGO solutions in accordance with our requirements. If in your country exceptionally no OBTEGO partner is available, then we take over the consultation and on-site support directly. This is our promise to you for highest OBTEGO quality.
