

Renovation of concrete surfaces with freeze-thaw and deicing salt damages

CDF-test (Capillary suction of deicing chemicals and freeze-thaw attack). Testing method of frost and deicing salt resistance on concrete.

CDF-test (Capillary suction of deicing chemicals and freeze-thaw attack). Surface with OBTEGO treatment after attack.

**Densification and hardening
of the surface**

**Strong reduction of
capillary water absorption**

Alkali-resistant

Water vapor diffusion open

Water and oil repellent
