

Silicate Portfolio

Product	Gloss	Hardening & Densification	Protection	Description
OBTEGO P-2 Lithium silicate				Concrete densifier and surface hardener (Lithium silicate). Silicate with high active ingredient content for surface hardening of concrete floors (dust-binding).
OBTEGO P-3 Potassium-Lithium silicate				Concrete densifier and surface hardener (Potassium-Lithium silicate). Silicate blend with high active ingredient content for hardening of concrete surfaces (dust-binding).
OBTEGO P-5 Lithium silicate				Concrete densifier and hardener with gloss effect and surface protection (Lithium silicate). Silicate with high active ingredient content for hardening of concrete surfaces (dust-binding). Reduce the capillary water absorption and increase the gloss level.
OBTEGO R-30 Hybrid silicate				Premium densifier and hardener with surface protection (Hybrid silicate). Silicate with high active ingredient content for hardening of concrete surfaces (dust-binding). Strong reduction of capillary water absorption. Higher protective effect.
